## Instruction Manual to Setup **Reseller Dashboard** and Steps how can manage it yourself

Going app way in today's fast growing mobile industry can help you attract new customers, retain existing ones and make your business stand out from the competition. Truthfully, mobile apps have become the next frontier of business promotion and according to the latest predictions from tech giants, the number of app downloads is expected to reach 268.69 billion by the end of 2017.

Becoming a reseller with Appy Pie, a leading cloud-based, drag-and-drop app builder, is sure to get your task done the right way. Appy Pie's mobile app reseller program has been specifically designed to help small and medium sized businesses improve their growth and revenue by allowing their customers to create beautiful apps for Android, iOS, Windows, and many other mobile platforms.

# Reseller Dashboard

## 01 My Apps

In this section, you can manage all of the apps that have been created on your own reseller platform. Here you can edit the app, or deactivate it, or add advanced app features like monetization, analytics, push notifications and many others.

## 02 Create New Apps

Create New Apps: You can create an app in three simple steps. Choose a category, build the app and publish it. You can create mobile apps without any programming skills. Simply drag & drop app pages to finish creating the app.

## 03 My Users

In this section, you can manage all your clients, and their registration details, number of apps created by them, contact details and status. You can add, delete and edit client's information from here, or offer free apps on basis of their credit balance.

<b>My Apps</b>   Manage your clients by adding, deleting or editing them here. Keep track of their registration details, number of apps created, contact details and status. Use this option for offering free apps to clients basis credit balances.	<p>This is the area where you manage all your apps you have created on your own reseller platform. Here you can edit an app, deactivate it, add advanced app features like monetization, analytics, push notifications and more.</p> <p>This will redirect you to your reseller platform.</p>	<b>Create New App</b>   You can create an app with three simple steps. Choose a category, build the app and then publish it. You can create mobile apps without the use of any programming skills. Simply drag & drop app pages.	<p>This will redirect you to your reseller platform.</p>
	<b>My Users</b>   Client Apps can be easily activated, locked or marked as featured here. Check for app creation and app update dates and current status in the marketplace here..		<b>My User Apps</b> 
<b>Configuration Settings</b>   Create discount coupons, edit them or simply delete them when expired here. You can also activate/ de-activate them with this option.	<p>Customize the app builder with Web settings, SMTP settings, Payment Settings and Global Settings. General Settings can be used for updating Facebook ID, Soundcloud ID, App Submitter Email, Logos for Site and Emaler . The Price Markup in percentages is also added here.</p>	<b>CMS</b>   Customize and update the app builder Home page content. You can update the content of About Us section OR add new section from here which will appear in Home page..	
	<b>Manage Coupon</b>   Update your account settings here, from changes to personal information like name, email ID, password and other contact details to subscribing to the newsletter, can be all done here.		<b>My Account</b> 
<b>Payment History</b>   Track and manage your payments with subscription dates, coupon codes, and payment method details.	<p><b>Credit Balance : 3</b></p>	<b>My Plan</b>   Pricing Plans after addition of the markup percentages are shown in this section. Please note that to revise the pricing, you will need to go to Configuration settings and change the Price Percent field.
